

## Press release

**10<sup>th</sup> March 2008**

### **Air tightness: invaluable guide from Chiltern Dynamics**

Chiltern Dynamics has produced a further free technical information sheet to assist designers, builders and developers to pass the air tightness test, now compulsory under Approved Document L – *Conservation of Fuel & Power* of the England & Wales Building Regulations. The regulations apply to most new buildings, including large extensions to existing non-dwellings.

TI-0809 *Achieving Air Tightness in Buildings* will help identify potential areas of air leakage and how to prevent them. The regulatory requirements themselves are covered in more detail in Technical Information Sheet TI-0808 *Air Tightness Testing*. For free copies of either sheet email [epeters@ttlchiltern.co.uk](mailto:epeters@ttlchiltern.co.uk).

- Chiltern Dynamics is staging a further '*Air tightness Testing Explained*' training day at its High Wycombe headquarters on 5th June 2008. Cost is £125 + VAT for TRADA members and £145 + VAT for non-members. Group discounts are offered. For more information telephone 01494 569800 or email [airtight@chilterndynamics.co.uk](mailto:airtight@chilterndynamics.co.uk).
