H Jarvis achieves BFRC hat trick with BM TRADA

Redcar-based H Jarvis & Son has achieved A, B and C window energy ratings with BM TRADA Certification. The energy rated products are the energiKare Premium (A), based on Pilkington's energiKare glass, the EcoPlus (B) and Eco (C) ranges.

Managing Director Dave Glendinning said, 'When we decided that we wanted to be able to offer not just an energy rating but an A rating as an option, we turned to BM TRADA as we enjoy a good working relationship with them in other areas.' H Jarvis has also received Energy Saving Trust Endorsement.

The company diversified into PVCu windows more than 10 years ago and produces more than 30,000 units a year. The company uses LB Plastics profiles for all its window ranges. Details of all products can be found on the company's newly relaunched website at www.hjarvis.co.uk.
