

Press Release

2nd November 2007

Kleinhans makes striking first impression at Interbuild

Kleinhans GmbH is a second-generation manufacturer of aluminium-clad timber windows. Well established in its home market of Germany and in neighbouring France, the company has worked hard to meet specification requirements in the UK. It has now achieved certification under BM TRADA Certification Ltd's Q-Mark scheme for enhanced security windows, a stepping stone to Secured by Design, and is targeting the Q-Mark for High Performance Windows. It has also achieved BFRC A, B and C window energy ratings with BM TRADA.

Director Markus Kleinhans was pleased to accept the certificates from BM TRADA's Adam Osborn and Jim Collins at Interbuild this week. Mr Kleinhans said: 'We are proud of the quality of our product. We make the highest demands on materials and technology to ensure quality and consistency in manufacture.'

The company offers a range of species, including redwood, whitewood, larch, oak and meranti, clad externally with powder-coated aluminium. 'The use of timber from sustainable forests is important to us,' Mr Kleinhans added. 'We are, in addition, one of the few partner firms to have achieved "Sikkens Longlife Windows" status and can offer a 10-year guarantee on the finish.'
